

How to leave a review on AWS Marketplace

1

Find the product listing

You can get there in either of two ways:

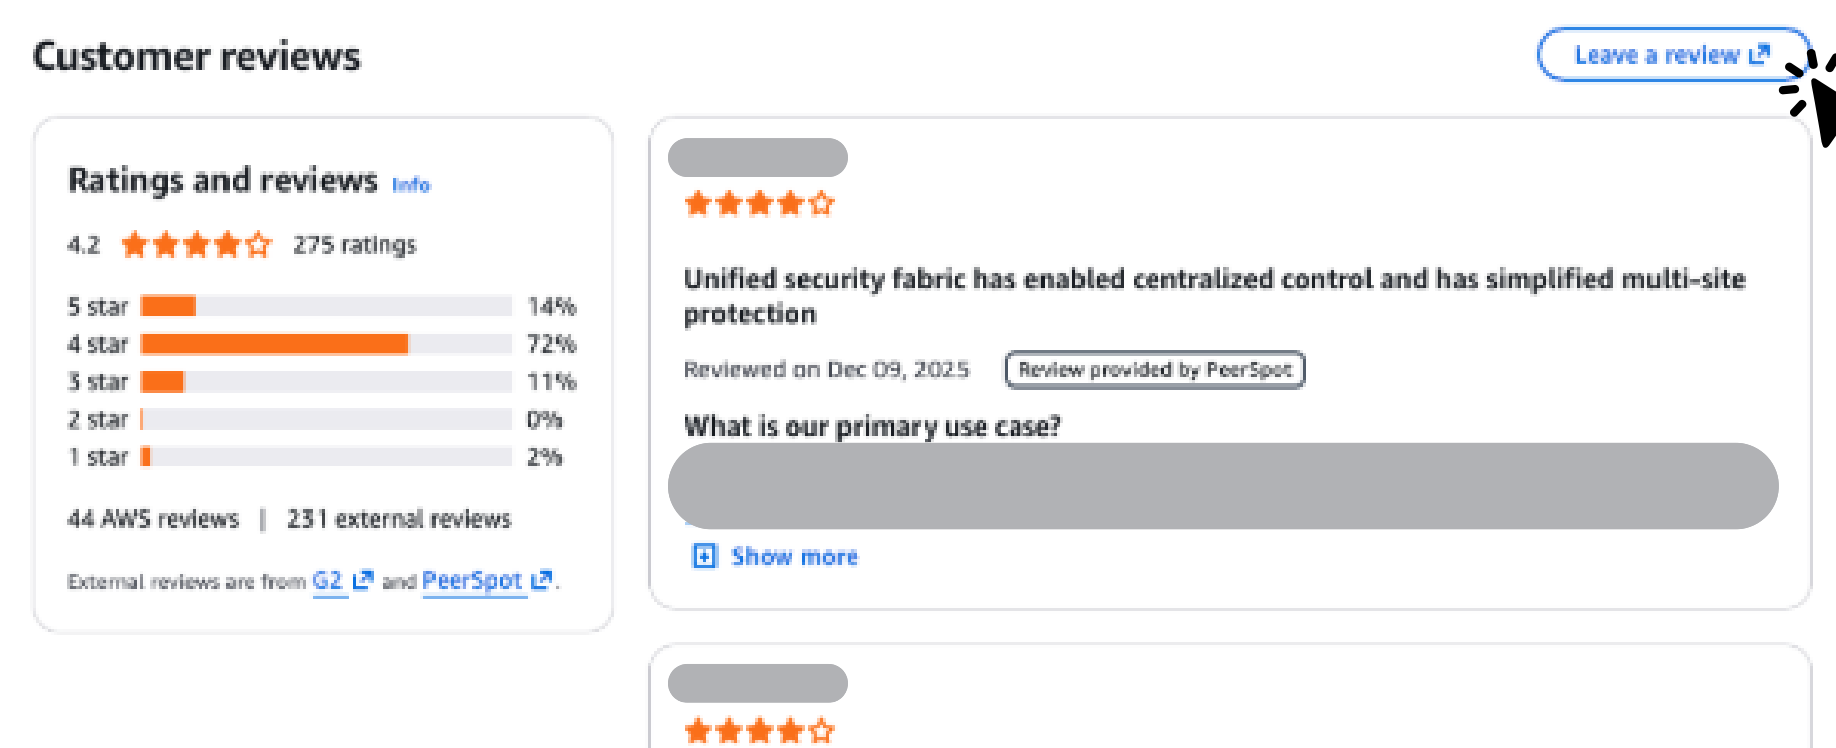

- Use the **direct product link** provided by the vendor, or
- Search for the product name in AWS Marketplace

Click the product to open its listing page.

2

Open the Reviews section

1. Scroll down the product listing page
2. Find the “**Customer Reviews**” section
3. Click “**Leave a review**” (or similar call-to-action)

3

Complete the review form

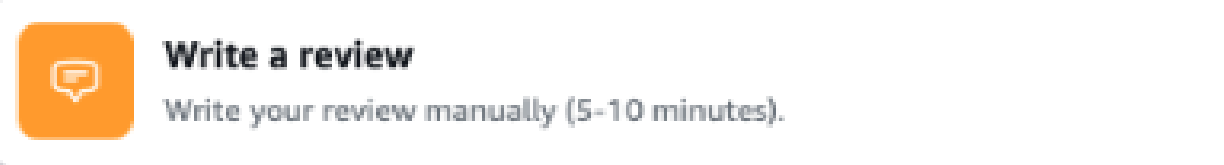

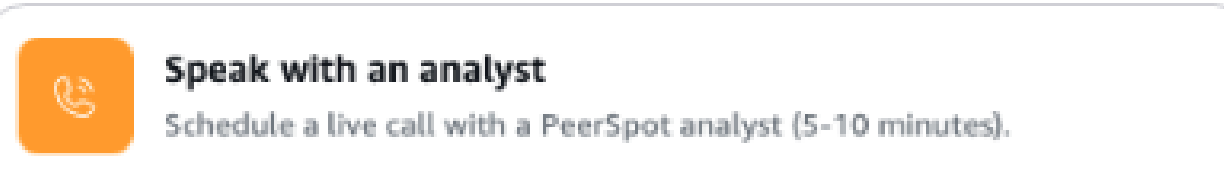

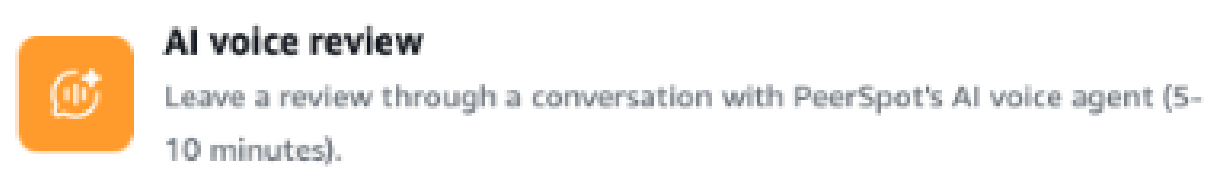

AWS will give you the option to submit your review.

Note: *It is fun and easy to use the AI voice review*

Share your AWS Marketplace product review

By leaving your review, you help others make informed decisions about their technology investments. Choose your preferred method to share your review.

In collaboration with
aws marketplace

Helpful things to include as this just isn't a star rating for the vendor to earn a badge - it is your way of sharing advice and insights to your peers:

- What problem you were solving
- Why you chose this product over alternatives
- What worked well in practice
- Any tradeoffs or limitations
- Who this product is a good fit for (and who it isn't)

4

Submit the review

- Review your entry
- Click **Submit**

Your review may go through a short moderation process before appearing publicly.

What happens next

- The review is published on the AWS Marketplace product page
- Buyers and procurement teams can reference it
- Your feedback helps other practitioners make better decisions

Tips for reviewers

- Honest, specific feedback is more valuable than perfect praise
- Mentioning tradeoffs increases credibility
- AWS does not share your contact details publicly
